Impact of Internet Protocols on Human Rights

Why

- Standards and protocols form the basis of the Internet.
- Internet is (often) a right enabling infrastructure.
- Is there a correlation?

Why

- Standards and protocols form the basis of the Internet.
- Internet is (often) a rights impacting infrastructure.
- Is there a correlation?

RFC1958

- Many members of the Internet community would argue that there is no architecture, but only a tradition, which was not written down for the first 25 years (or at least not by the IAB). However, in very general terms, the community believes that:

the goal is connectivity,

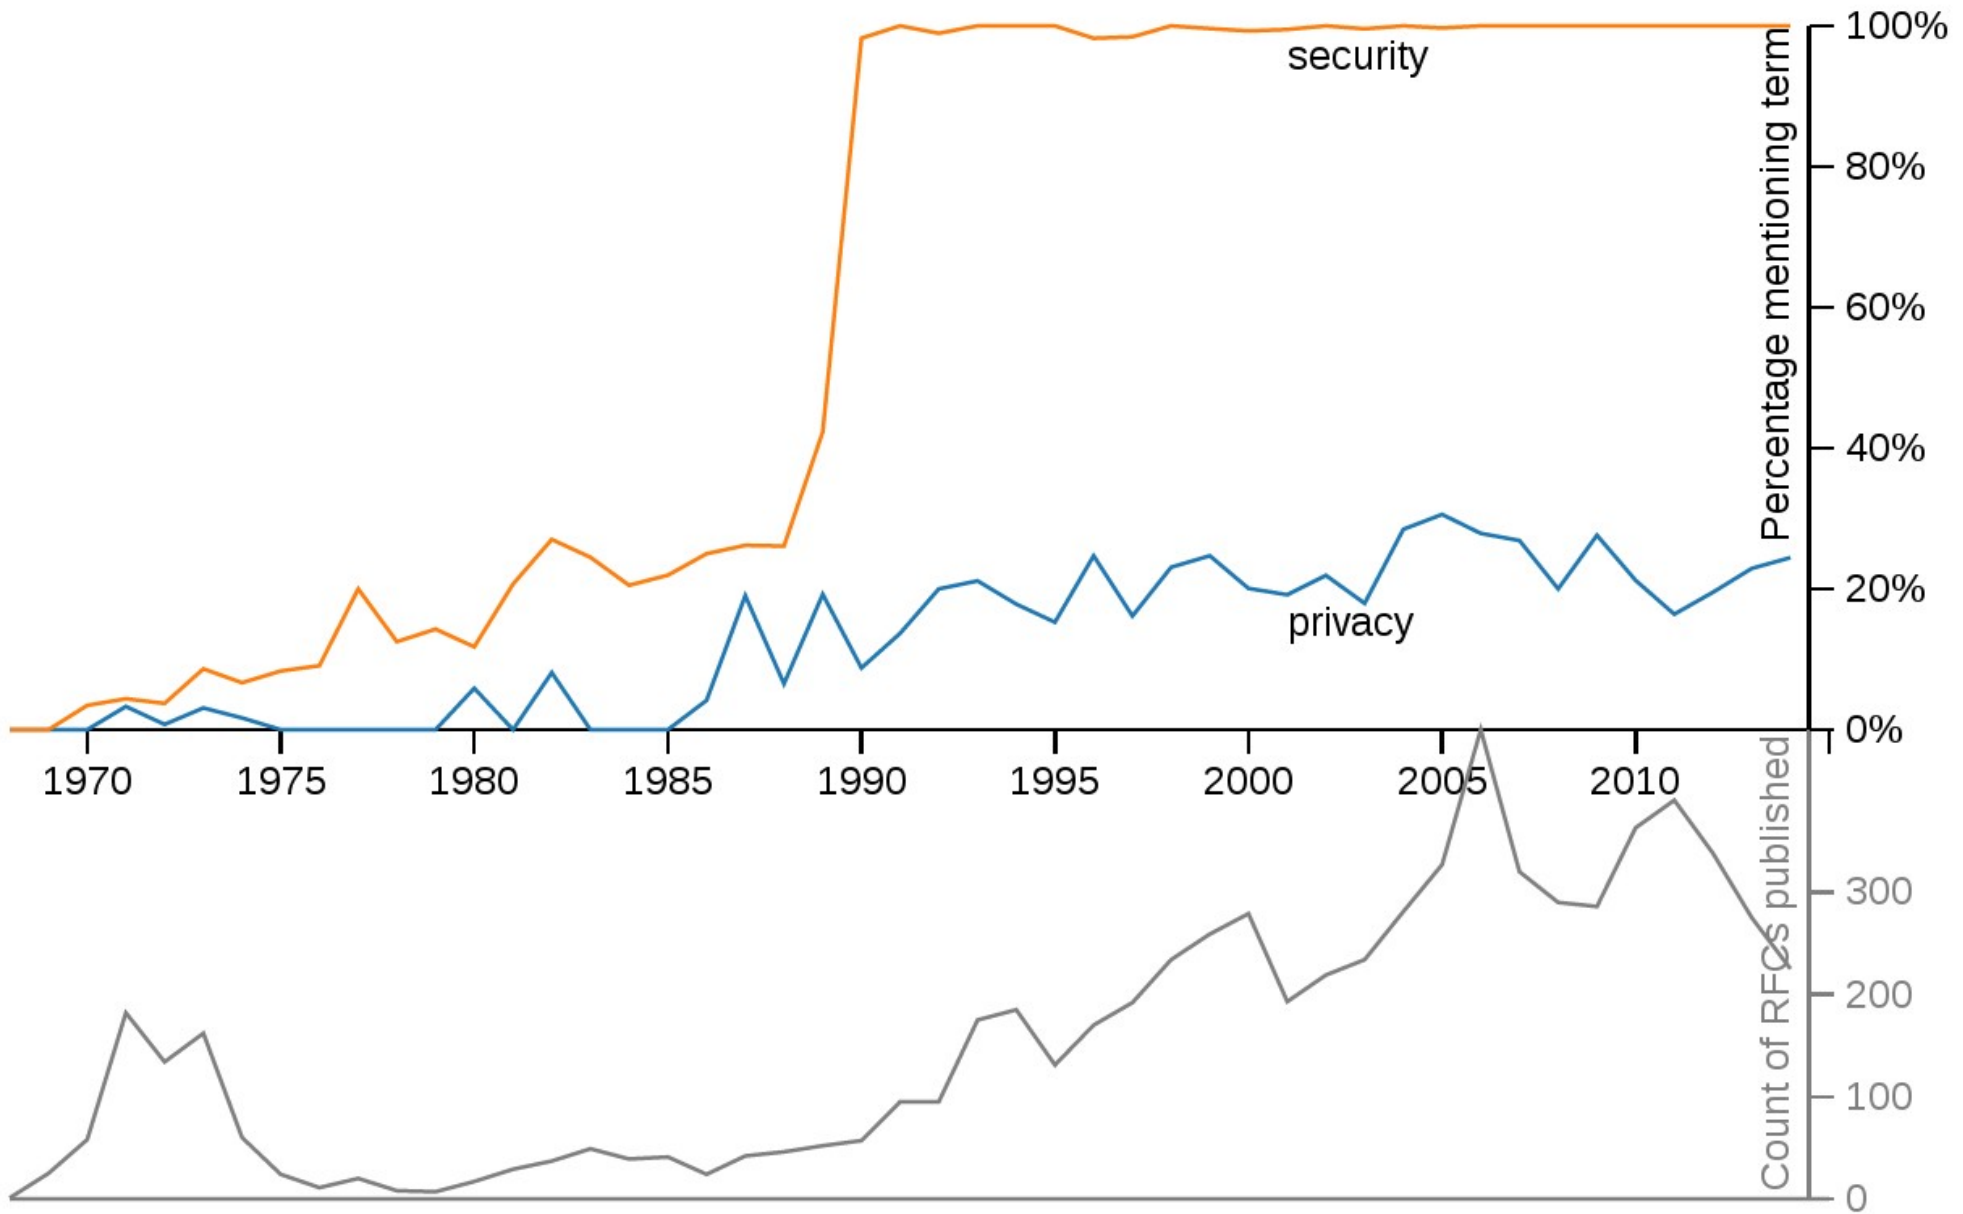

the tool is the Internet Protocol, and

the intelligence is end to end rather than hidden in the network. (emphasis added)

RFC3935

The Internet isn't value-neutral, and neither is the IETF. We want the Internet to be useful for communities that share our commitment to openness and fairness. We embrace technical concepts such as **decentralized control, edge-user empowerment and sharing of resources**, because those concepts resonate with the core values of the IETF community. These concepts have little to do with the technology that's possible, and much to do with the technology that we choose to create.

Increased work on security

Length of security considerations

Antecedents

- The entrypoint is RFC6973
Privacy Considerations for Internet Protocols
 - Offers guidance for developing privacy considerations for inclusion in protocol specifications.
 - Aims to make designers, implementers, and users of Internet protocols aware of privacy-related design choices.
 - Suggests that whether any individual RFC warrants a specific privacy considerations section will depend on the document's content.
 - Defines engineering terminology to describe
 - Entities
 - Data and Analysis
 - Identifiability
 - Builds on previous body of security analysis by recognizing the threats to privacy are security threats.
 - This research intends to do the same for Freedom of Expression and Freedom of Association

Why?

"ICANN is bound to operate "for the benefit of the internet community as a whole, carrying out its activities in conformity with relevant principles of international law and applicable international conventions and local law"

- Article 4 of ICANN's Articles of Incorporation

ICANN's policies and operations have
the potential to impact human rights

RIGHT INVOLVED	THEME	ICANN POLICY OF PROCESS
Freedom of expression	New gTLD programme	Applicant Guidebook <ul style="list-style-type: none"> - community-based TLDs - Sensitive strings New gTLD subsequent round
	Rights protection mechanism <ul style="list-style-type: none"> - Trademark Clearinghouse (TMCH) - Uniform Rapid Suspension Procedure (URS) - Post-delegation dispute resolution procedure (PDDRs) - Public Interest Commitments (specification 11 of the Registry Agreement) 	Rights protection mechanism is ALL gTLDs Curative Rights protection for IGOs/INGOs Protection of International Organization Names is ALL gTLDs
	IDNs	Implementation of IDNs
Freedom of association	New gTLD programme	Applicant Guidebook <ul style="list-style-type: none"> - community-based TLDs
Economic and social rights	New gTLD programme	<ul style="list-style-type: none"> - Application fees - Auctions
Privacy	WHOIS	Next generation gTLD registration directory service (to replace WHOIS) Thick WHOIS PDP
	2013 Registrar Accreditation Agreement	<ul style="list-style-type: none"> - Whois accuracy specification requirement -
Due process	PDP procedure	GNSO PDP improvements discussion group

Scope and focus

ARTICLE 19

- UN Guiding Principles on Business and Human Rights
- UN Guiding Principles on Business and Human Right for the ICT Sector
- Not expanding ICANNs mission
- Human rights impact assessment
- Human rights policy

Key elements of the Corporate Responsibility to Respect

Step 1

- Create a human rights review process
- Review existing policy development process itself for human rights impacts and consider areas of improvement
- Apply the human rights review process on a pilot basis for ICANN's policy development process

Step 2

- Taking into account the results of the pilot, formalise the human rights review process for ICANN's policy development process
- With this input, consider a human rights policy statement in the context of policy development process

Step 3

- Consider carrying out an organisational level human rights impact assessment for the entire ICANN operations, in collaboration with external experts
- Consider an organisation-wide human rights policy statement, integrating the human rights policy for policy development process

Step 4

- Consider a CSP strategy
- Consider a CSR reporting
