

## **Application for Community Regional Outreach Pilot Program (CROPP), 2016**

1. Name: Vidushi Marda
2. Traveler Contact Information and Itinerary: Email: [vidushi@cis-india.org](mailto:vidushi@cis-india.org)  
From: Bangalore, India
3. Special Travel Circumstances: In case CROPP covers accommodation, I will need 3 nights' stay as that will allow me to attend the full conference.
4. Event/Conference Name, Title, or Descriptor: Asia Pacific Regional Internet Governance Forum (APrIGF)
5. Event/Conference Dates: July 27, 2016 - July 29, 2016.
6. Event/Conference Website Link: <http://www.aprigf.asia/>
7. Primary Event/Conference Location: NTUH International Convention Centre, No. 2, Xuzhou Rd, Zhongzheng District, Taipei City, Taiwan 100
8. ICANN Geographic Region: Asia Pacific
9. Proposed Goals and Outcomes:

This mission comprises three distinct work plans to carry out NCUC outreach.

  - a. The first, is to take part in a special panel titled "Internet Architecture and Human Rights" which will discuss the human rights challenges that have arisen within ICANN and the IETF, along with the need for enhanced accountability for human rights protection within both the internet architecture and international law. This will contribute towards substantive NCUC outreach and awareness about policy making within ICANN. This panel is 60 minutes long. It has 6 proposed members - Mr. Rafik Dammak, Dr. Zuan Zhang, Dr. Angela Daly, Mr. Arun Mohan Sukumar, Mr. Jean Jacques Sahel and myself. It will be moderated by Dr. Monika Zalnierute.
  - b. The second, is in my capacity as an active member of the Cross Community Working Party on ICANN's Corporate and Social Responsibility to Respect Human Rights (CCWP - HR), under which I currently head the Research Sub Group. I intend to introduce and highlight the CCWP - HR's work in relevant discussions and panels during the whole meeting, to increase visibility of our efforts and to encourage interested individuals to join our work.
  - c. The third, is to actively engage with civil society and academia through different communication channels for the duration of the conference. This will definitely help bolster new membership to the NCUC as well as the larger ICANN

community. We are also hoping to have an NCUC Outreach Session with a reception, although this has not been confirmed yet.

The target audience through these three approaches are the following:

1. Civil society
2. Academia
3. Individuals and organizations interested in ICANN policy making processes and who would like to have more information about the same.
4. Individuals and organizations interested specifically in the human rights aspect of ICANN, who would like to know more and get involved.
5. Individuals and organizations who want to learn more about how to get involved with ICANN through the NCUC, and if applicable, through other modes as well (depending on their inclination and interests).
6. Individuals and organizations who wish to contribute their expertise to the work of the NCUC and to ICANN.
