To: farzaneh badii &lt;farzaneh.badii@gmail.com&gt;

I feel great pleasure to share with you my statement of interest to participate in Leadership pilot program. I will first start by providing you with you a brief bio and then state my motives behind participation.

### 1-Bio

Aicha Jeridi is a teacher, internet policy analyst, And researcher.

She has a master degree in International Relations. She is Active in civil society through many activities. She is a member of the North African Igf Mag, and involVed with IGMENA, Tunisian Chapter, which is a program launched by Hivos Foundation to create discussion Forums related To Local, regional internet Governance issues, specifically in Mena Region.

She has recently been elected as The Coordinator General of ACSIS (Association of Civil society of Internet Society) in North Africa.

Aicha is also involved with Jasmin Foundation , a Tunisian think tank, and entitled with the mandate of producing A policy paper about political economy.

She was involved with Fifth African Igf as the rappoteurGeneral of the event and drafted the final report and recommendations.

Aicha is a Diplo foundation, Hivos, Afrisig fellow and member of Internet society.

She integrated Ican community by joining Non Commercial Users Constituency and The Middle East and Add joined Countries Strategy working group.

Aicha is furthermore active with IIDeBate , in their program Café Talk, as a moderator and an ambassador.

### 2-Reasons for taking the training:

I think that my experience with the Internet Community within, IGmena, the IGF, African school of IG, and with ICANN groups and constituencies, would add value to the participants in the program. Furthermore, I will save no effort nor expertise to cooperate with all team members, representatives of diverse stakeholders in any issues subject to discussion within the training.

My knowledge extends to both technical and policy arenas and I am convinced that through my participation in this particular program, this knowledge will improve and will undoubtedly enhance my leadership and facilitation skills, which would be reflected in my performance as a member of NCUC and other groups.

It will allow me indeed to dig deeper and work closer on ICANN complex policies principles and bodies.

Because I am still in a leader in learning process, I believe that this opportunity would be a good incentive for me to work harder and harder, as it will value my contribution in ICANN community.

Looking forward to receiving from you soon.

Warm Regards.
