❖ NCUC Noncommercial Users Constituency stands for civil society organization of the internet corporation for numbers and names assignement and Generic Names Supporting Organization (GNSO). NCUC is on charge of supporting and development of positions related to activities about internet and it represents a part of Non Commercial Stakeholder Group. The focus of NCUC community is to represent the activities of non commercial organizations such as researchers, academia and other organization exploiting internet.NCUC allows election of representatives into the GNSO Council, collaboration with different stakeholders in ICANN, investigate internet governance issues. The structure of NCUC is based on : Executive Committee, policy committee together with a members engaged with different activities in non commercial/non profit way.

❖ I am very motivated to attend the event of ICANN 77 since i already participated into ICANN 65 and want to update my knowledge about ICANN activities and engage more with members of NCSG to be more involved. Since i am a PhD in telecom, senior researcher at Innov'COM Lab of Sup'COM Tunisia and chief engineer at Telecom operator, i want to explore my technical and communication skills with NCSG community to collaborate more. My starting point was ICANN Learn plateform which represented efficient ressource of knowledge about ICANN activities and meetings purpose.

❖ During ICANN 65 i was mentored by Mr Amr Elsadr and i gained many contacts and motivated to be more active with NCUC acticities. Hence, if i gain the chance of representing the constituency i can exploit my communication skills to be more involved in NCUC activities. Recently i attended AFIGF forum held in Malawie and i am feeling very motivated to invest my skills in internet governance especially that i am a member of African Union Expert Cybersecurity Group. In addition, there is many problem related to internet resilience , digital divide and data justice that i want to discuss with experts. In addition, i am interested on developing a framework around how to coordinate the work of regional strategic engagement to drive capacity building, outreach and engagement with NCUC and NCSG Africa members.

❖ I am planning to attend all sessions of NCUC and ISPCP constituency in particular since i am working as chief engineer at telecom operator and it is an opportunity for collaboration and networking and to study more policy topics. I want to discuss more about IPV6 migration. I am ready to stay engaged or volunteer to mentor future NCSG members since i have already an experience in supervising PhD students in different research topics.

❖ I confirm that i am ready and attentive to all visa requirements and other documentation to attend.
